CLOSING PRICES OF BOSTON STOCKS.

Monday, December 7-p. m. The wise men on the Stock Exchange who possess occult powers, foresight and other such faculties gave tips on the President's Message this morning, and early trading was influenced to some extent on these utterances. Transactions, however, were limited, and prices moved within narrow fluctuations, small changes being made according to the good or evil predictions made by the speculating soothsayers. The majority of traders did little until the publication of the Message, and then it was too near the close of business to accomplish any marked results, either in the volume of business or in price movement. The bear element made a drive at values as soon as the Message was received in the Street, but losses thus brought about were small and were followed by no liquidation among important interests. The points which concerned the Street most were the treatment of our foreign relations, more particularly with reference to Cuba, the Pacific Railroad debt, trusts and tariff and currency matters. The Cu-ban question was treated of in a way generally expected; also the Pacific Railroad debt, but both were used by the bears to hammer prices, while what was called an attack upon trusts gave great uneasiness and

pain to bear traders who endeavored to point

cut serious results to the trust stocks on the

Exchange. Small declines did follow, but partial recoveries were made at the close. The portion of the Message which was received with general distavor in the financial community was that in reference to the country's revenues as produced by the present tariff law. The President approves this law, and after stating that there is a surplus in the Treasury of more than \$125,000,000, in addition to the government that fund is nothing more than its proper and legitimate use. The Government thus applying a surplus fortunately in its Treasury to the parment of the propers and the surplus fortunately in its Treasury to the parment of expenses on the keined to a man living mues, is not at one and thus incurring debt or encreaching on his principal." It is pertinent to remark in this connection that the surplus fund which the President speaks of was created by successive issues of Government that it is proper and legitimate to meet any deficiency in the revenue from the reserve fund in the Treasury is sound enough dediciency control of a surplus fund by bond issues for meeting from the control of a surplus fund by bond issues for meeting revenue deficiencies? The cost of maintaining revenue deficiencies? The deficits of the Wilson of the will be not be proved that it is proper and legitimate to mose to a surplus fund by bond issues for meeting revenue deficiencies? The deficit of the Wilson of the will be not be proved the deficit of the Wilson of the will be not be proved to the country. For this fiscal year to deficiency the deficiency of the proved to the country of the president of the country of the p with general disfavor in the financial community was that in reference to the country's reve-
